

# Standard Test Procedures (STPs) for Pharmaceutical Tablets

## STP ID:

2

## Product Name:

This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping.

## Batch Number:

87873445

## Manufacture Date:

2024-07-19

## Expiry Date:

2024-07-25

## Active Ingredient Concentration:

This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping. This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly w

## Capsule Size:

This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping. This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly w

## Dissolution Test:

This ensures the title is correctly centered at the top of the page, and subsequent content is displayed proper This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping. ly w

## Hardness Test:

This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping.

## Moisture Content:

This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping. This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly w

## Uniformity of Dosage Unit:

This ensures the title is correctly centered at the top of the page, and subsequent content is disp This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping. This ensures the

# Standard Test Procedures (STPs) for Pharmaceutical Tablets

## **Appearance:**

This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping. This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping. This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping.

## **Packaging Integrity:**

This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping.

## **Storage Conditions:**

This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping. This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping. This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping.

## **Stability Testing:**

This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping. This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping. This ensures the title is correctly centered at the top of the page, and subsequent content is displayed properly with margins and wrapping.
